objective

Passionate software developer with 14+ years experience of building web based products and tools covering multiple industries. Looking for challenging environment that enables me to utilize my skills in crafting solutions.

technical

javascript · node · typescript · jest

react · web/service workers

browser APIs · websockets · sass

solidjs · mongodb · rest · webpack

esbuild · web-components

experience

Senior Javascript Developer
@ Picsart

Feb 2022 - Present

Worked in multiple product teams starting from Engagement, Profiles and currently with Spaces my responsibilities included

- analysing, reproducing and fixing bugs reported by the error monitoring tools like bugsnag

- developing individual components with tests for the various projects.

- setting up and delivering the Spaces project from scratch

- co-ordinating with other teams to manage release cycle of team projects

- introducing a culture of good coding practices within the team

Senior Javascript Developer
@ Dynatrace

Jan 2020 - Jan 2022

Core member of the team that handles Session Replay its is used to capture and index the complete user interaction on a website and replay it in a movie-like experience. I have been working on

- Resource capturing module - a module that enabled the agent to capture the complete contents of all the CSS from a web-based application and use it again on replay without having to fetch the resource from the original URL

- Improvements on the recorder, identifying performance bottlenecks and improving memory usage

open source

ChatGPT - Lets talk

Chrome extension

Created & working on a Chrome extension that makes it possible to interact with ChatGPT in its website using your voice & a few keyboard shortcuts. Using it, you can ask questions to ChatGPT without having to type anything & hear it read the answers out loud once they are generated.

Chrome store · Github
